**Advancing Equity in Telehealth through Person Centered Care**

**Learning Objectives**

- **Discuss considerations of using telehealth to expand equity and access to specialized care, using first-episode psychosis and Deaf community as case examples.**
- **Explore the future evolution of telehealth and its capacity to advance person-centered approaches that align with individual preferences, communication needs, and recovery goals.**
- **Evaluate how researchers, advocates, and individuals with lived experience can contribute to the development, dissemination, and assessment of innovative telehealth service models.**

Building the Plane as we Fly: Considerations for Scaling Out Coordinated Specialty Care for Early Psychosis in the Rural United States

Journal of Rural Mental Health 2025, vol 49, no 4, 319-330
